DETAILS

COMPANION LUMINAIRE(S)

CUSTOMIZATION

Ask us about the following possibilities: Section lengths in 1' increments, additional mounting options, custom colors and other modifications.

HIGHLIGHTS

- Total System Integration features
5-year limited warranty by Acuity Brands covering all components and construction
- 4', 5', 6', 8', 10' and 12' Sections
- Up to 139lm/w
- Multiple outputs available
- Softshine[®]-engineered comfort optics
- Enhanced batwing distribution through optical film
- Flicker-free dimming to dark (0.1%) powered by eldoLED[®] driver
- Integrated nLight[®] for system networking wired and wireless (optional)
- Integrated sensor for daylight dimming and/or occupancy detection (optional)
- Flat or sculptured end caps
- White, black, aluminum or custom color
- **QuickShip** option available

LUMEN PACKAGES

Based on 80CRI @ 3500K @70/30. Additional outputs and color temperatures available.

Indirect/'Direct LED Output	ID500LMF	ID900LMF	ID1400LMF

C110 Painted aluminum (low gloss)	BAA***** Buy America(n) Act and/or Build America Buy America Qualified	GLR Fast blow
C210 White white (fine textured)	BLK* Black cord, cord manager and canopy	GMF Slow blow
C202 Black (fine textured)	CSA** Manufactured to Canadian standards	IND***** Individual luminaire (factory installed end caps and power cord; hanging hardware in box)
C099** Custom color	CP Chicago Plenum (available with F1A only)	MCS***** Matching canopy at support for aesthetics
RALTBDB* Ral Paint finishes	DU Dust cover	MCSJ***** Matching canopy for J-box mounting at non-power feed support locations
*RALTBDB for pricing only. Replace with applicable RAL number and finish when ready to order. See the RAL BROCHURE for available color options. Standard finish choice is Textured (RALxxxxT)	ELH**** Emergency through wiring w/separate neutrals-single EM feed at opposite end of normal	OJB***** Offset J-box at feed
C099 for pricing only. Custom color chip and requested finish needs to be sent in to your Customer Care Rep and matched up with our paint department and customer approved before order is entered. Standard finish choice is Textured (C099T)	ELS2** Emergency through wiring w/separate neutrals-single EM feed at same end of normal	SCEP Sculptured end caps
	*Not available with NLIGHT or IND option **CSA with EC consult factory ***Not available with CSA. *****BAA Not available with 10' & 12' sections	SLP***** Sloped ceiling
		*****Not available with F1A, SCEP, SLP, fixed cables (12F, 18F, 24F), F3 Stem mount, MSL5, MSL6 or MSL10. Not available with IND option *****MCS & OJB cannot be chosen together *****MCSJ Available with F2 Mount only *****When SLP is chosen need to choose F2 Mount and OJB.

SPECIFICATIONS

Housing

Nominal 8 1/4" x 1 3/4" rectangular housing is formed from cold-rolled steel.

End Caps

Die-cast end caps are mechanically attached with no exposed fasteners. Flat end caps standard. For sculptured end caps, choose option SCEP.

Color

Color for housing and end caps is white, black or painted aluminum. Consult factory for custom colors.

Luminaire Length

Luminaire is available in 4', 5', 6', 8', 10' and 12' sections. Using internal joiners, any section combination can be joined to form longer rows with almost 1ft incremental lengths. Add 5/8" for each flat end cap and 4" for each sculptured end cap.

Source

Multiple LED lumen packages and five available color temperature options (2700K, 3000K, 3500K, 4000K and 5000K) — all within 2.5 MacAdam ellipses.

Optics

Softshine® optical system consists of high performance lens, diffusers and metal reflectors.

Dimming Driver

eldoLED driver provides "natural dimming" with smooth, continuous and flicker-free operation to 0.1% dim levels. Acuity luminaires incorporating eldoLED LED drivers perform within the recommended operating areas for flicker as a function of frequency and modulation (%) outlined in IEEE Standard 1789-2015 (IEEE Recommended Practices for Modulating Current in High-Brightness LEDs for Mitigating Health Risks to Viewers), in typical operating conditions at representative dimming levels. Syncing for controls: 2mA max. THD: < 20%. Insignificant inrush current at 120 and 277VAC. FCC Class A and B tested for EMI and RFI. When Control Input of 0-10V is specified driver will be set for linear dimming curve, if NLIGHT is

specified driver will be set for logarithmic dimming curve.

eldoLED Driver for MIN1 and DARK only

nLight Air Wireless

The integrated API smart sensor is part of each luminaire in the nLight AIR network, which can be grouped to control multiple luminaires. The granularity of control with the digital PIR occupancy detection and daylight sensing makes a great solution for any application.

Optionally you can order nLight AIR less sensors for compatibility with an nLight Air wireless system.

Controls and System Networking Options

For wired networking via Cat-5e, choose an integrated nLight® module. For daylight dimming and/or dual technology occupancy detection. See Integrated Sensor Layout Page for more details.

Electrical

LED light engine — consisting of modular LED boards and eldoLED® dimming driver — is rated for 60,000 hours (L80) at 25° C ambient temperature. Specify 120V or 277V. Pre-wired with 16AWG fixture wire. For special circuiting or wire gauge, consult factory. Plug-in electrical connectors included.

Environment

Suitable for damp location.

Validation

CSA/CUS listed. CSA tested to UL 1598 standards. LM-79 tested. Individual sections meet FCC Part 15 requirements. Lighting Facts partner.

Packaging

100% post-consumer recycled cardboard box and inserts. Biodegradable, protective luminaire bag. Recycled kraft paper tape.

Government Procurement

BAA – Product with the BAA option qualifies as a domestic end product under the Buy American Act as implemented in the FAR and DFARS. Product with the BAA option also qualifies as manufactured in the United States under DOT Buy America regulations. BABA – Build America Buy America: Product with the BAA option also qualifies as produced in the United States under the definitions of the Build America, Buy America Act. Please refer to www.acuitybrands.com/buy-american for additional information.

Warranty

5-year limited warranty. Complete warranty terms located at www.acuitybrands.com/support/warranty/terms-and-conditions

Note: Actual performance may differ as a result of end-user environment and application.

All values are design or typical values, measured under laboratory conditions at 25 °C.

A+ Capable Luminaire

This item is an A+ capable luminaire, which has been designed and tested to provide consistent color appearance and out-of-the-box control compatibility with simple commissioning.

- All configurations of this luminaire meet the Acuity Brands' specification for chromatic consistency
- This luminaire is part of an A+ Certified solution for nLight® control networks when ordered with drivers marked by a shaded background*
- This luminaire is part of an A+ Certified solution for nLight control networks, providing advanced control functionality at the luminaire level, when selection includes driver and control options marked by a shaded background*

To learn more about A+, visit www.acuitybrands.com/aplus.

*See ordering tree for details

FIXTURE PERFORMANCE DATA

How to Calculate Delivered Lumens in Emergency Mode

Use the formula below to determine the delivered lumens in emergency mode

Delivered Lumens = 1.25 x P x LPW

P = Output power of emergency driver. P = 10W for E10WLCP option.

LPW = Lumen per watt rating of the luminaire. This information is available on the ABL luminaire spec sheet. LPW = Lumen per watt rating of the luminaire. LPW information available in Performance Data section.

EXPECTED LIFE L80@60,000 HOURS

LINEAR PLAN:

PEERLESS offers the ability to provide a continuous run plan to suit your requirements by optionally offering three different methods of configuration.

LSL- Linear Same Length:

In this configuration, each segment is the same length and is standardized based on the longest length available and is the only option provided. Because it is dependent on one segment length there are mathematical limitations on what overall row lengths can be achieved. Example: 20 FT row would be achieved with 5, 4 FT long segments equaling 20 FT (nominal).

LSL	4FT	4FT	4FT	4FT	4FT
------------	-----	-----	-----	-----	-----

LLP- Linear Longest Possible

In this configuration, the longest length available is optimized, resulting in the fewest segments and mounting locations. Caution, should be used where balanced appearance is a concern. Example: 20 FT run would have 1, 12 FT segment and 1, 8 FT segment at the end of the run.

LLP	12 FT	8 FT
------------	-------	------

WEIGHTS & SUPPORT SPACING

Suspension spacing equals section length. Default location shown. Consult factory for stem mounting suspension spacing and alternate locations.

"Beginning of run fixture's center to center support spacing will be 13/16" less than the nominal fixture section length. Refer to Individual Fixture table for specific dimensions"

MOST COMMON MOUNTING TYPES AND OPTIONS Options available for this specific luminaire are checked in the boxes below.

Mounting Type

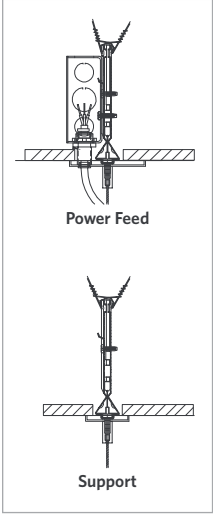

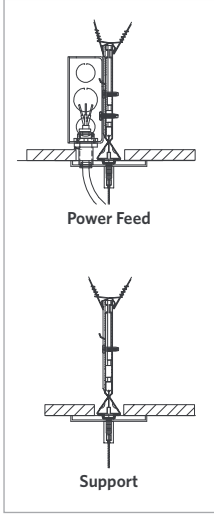

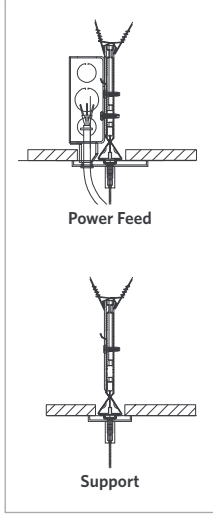

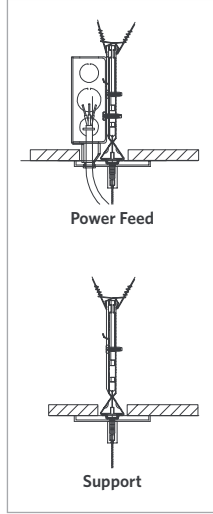

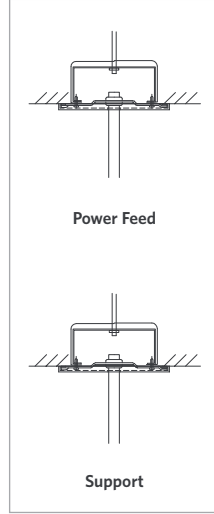

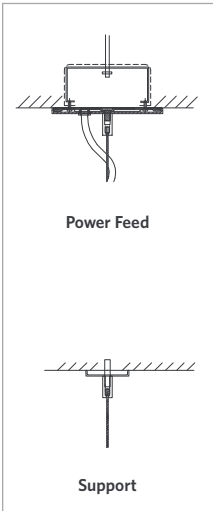

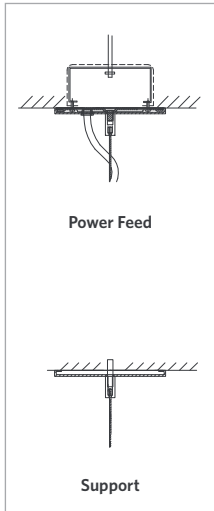

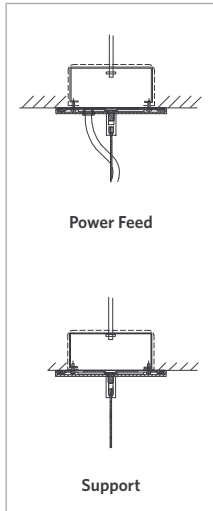

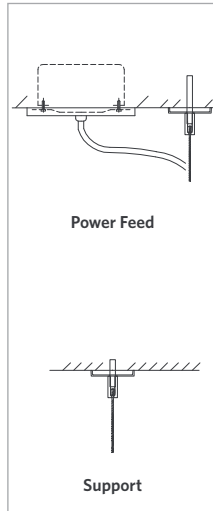

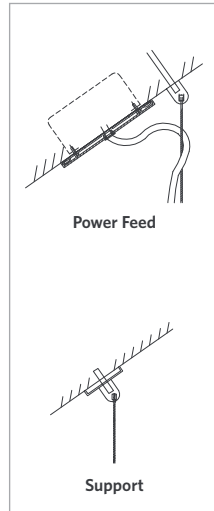

- F1/** For use with most T-Bar and screw slot grid ceilings. Designed for on-grid and off-grid applications.
- F2/** For use with recessed or surface mount horizontal J-box applications.
- F3/** Stem mounting for use with recessed or surface mount horizontal J-box applications. *Check with local jurisdiction regarding rigid stem code requirements.*
- F1A/** For use with most T-Bar and screw slot grid ceilings. Designed for on-grid and off-grid applications. *Comes complete with vertical J-box with built-in wire way. See also CP.*

Mounting Options

- MCS** Matching canopy at support for aesthetics.
- MCSJ** Matching canopy for J-box mounting at non-power feed support locations.
- OJB** Offset J-box at feed.
- SLP OJB** Sloped ceiling couplers and offset J-box option at feed.

For more detailed mounting drawings and information, see peerlesslighting.acuitybrands.com/resources/product-resources

INTEGRATED SENSOR LAYOUT

CORRECT:

Notes:

- Only one sensor per zone
- At the most, the entire run can only have 2 sensors (thus 2 sensors zones at the most)
- Sensor zone can not split fixture sections
- No overlapping zones
- NLIGHT - Nio goes where the nlight power packs are - power packs are one per zone
- One nLight or NLTAIR2 device per zone or per sensor, for multiple zones without sensors contact factory

INCORRECT:

EMERGENCY LAYOUT (Both EC and E10WLCP)

- Lit LED board
- Unlit LED board

MSD PDT7

RES7 PDT

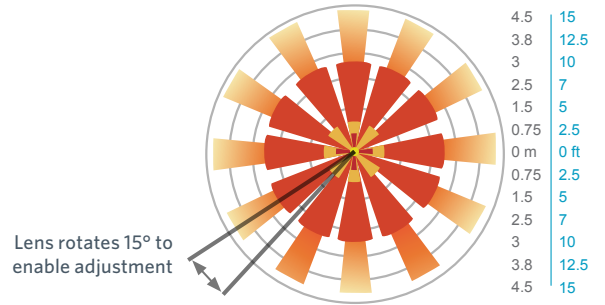

OCCUPANCY DETECTION COVERAGE

At the 7.5 ft (2.9 m) hanging height of a typical pendant mount fixture the sensor provides 10 ft (3.05 m) radial detection of small motion. At a 9 ft (2.74 m) hanging height the radius is 12 ft (3.66 m) for small motion.

Adequate for walking motion detection from mounting heights between 7.5 ft (2.29 m) and 20 ft (6.10 m).

Initial detection will occur earlier when walking across sensor's field of view than when walking directly at sensor.

Initial detection of walking motion into long coverage segment will occur at distances of 2x the mounting height up to 15 ft (4.57 m) and 1.75x up to 20 ft (6.10 m). Lens assembly rotates 15° to enable adjustment in order to line up long segments.
